   it was a one stop shop for questions for me, especially github copilot. instead of scouring stack overflow for the chance someone had the same weird error as me, i can feed copilot my code and it can help point me in the right direction. granted it isnt advanced enough to almost ever just straight up solve my problem, it is better than nothing and got me out of alot of sessions of debugging hell.

I never used it blindly as the truth, so i never needed to be that confident in it's answers. I mainly used it for ideas for what is wrong, not confidently taking whatever fixed it suggested and copy and pasting

13. Did you at any point abandon using AI tools and seek other resources? Explain your answer. * 🔲

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

no i didn't, no reason to abandon github copilot espcially when i have it for free.

15. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

    although i know i did the work myself, i feel like it is disingenuous to not credit AI with the help it gave me, it gave me foundational knowledge on my problems that i built up and was eventually able to solve. Granted my final answer might not look like the AI's response, but it did play a significant role sometimes
